

Sergio Cerutti. Professor in Biomedical Signal and Data Processing at the Department of Bioengineering, Politecnico di Milano, Italy. In the period 2000-2006 he has been the Chairman of the same Department and currently he is the Chairman of the Programs of Biomedical Engineering. His research interests are mainly in the following topics: biomedical signal processing (ECG, blood pressure and respiration signals, cardiovascular variability signals, EEG and evoked potentials), neurosciences and cardiovascular modelling. In his research activity he has put emphasis on the integration of information at different modalities, at different sources and at different scales in various physiological systems. Since 1983 he has taught a course at a graduate and a doc level on Biomedical Signal Processing and Modelling at Engineering Faculties (Milano and Roma) as well as at Specialisation Schools of Medical Faculties (Milano and Roma). He has been Elected Member of IEEE-EMBS AdCom (Region 8) in the periods 1993-1996 and 2011-2012. He is actually Fellow Member of IEEE, of EAMBES, of AIMBE and Associate Editor of IEEE Transaction on Biomedical Engineering. He is a member of the Steering Committee of the IEEE-EMBS Summer School on Biomedical Signal Processing. He has been Visiting Professor at Harvard-MIT Division Health Science and Technology, Boston, USA for an overall period of one year as well as for a period of four months at IST - Department of Physics, Lisbon, Portugal. He is the Author of more than 500 international scientific contributions (more than 250 on indexed scientific journals). In 2009 he received the IEEE-EMBS Academic Career Achievement Award and in 2011 he received the "Milano Ambassador of the City Award".
