

**WE REPRESENT**  
20 national and  
5 transnational scientific societies  
as well as 31 academic  
and research institutes

# ENGINEERING FOR HEALTH

## OUR MISSION

EAMBES was established from the need to represent and promote the medical and biological engineering and science communities in Europe

Serve and promote medical and biological engineering and science at a European and International level

Support and promote medical and biological engineering research and development, education, training and accreditation of scientific programmes

Facilitate relations between key policy makers and stakeholders in the area of biomedical engineering

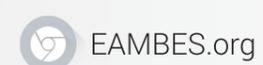

Recognize individual and group achievements and contributions to the field of medical and biological engineering and science

Acts as **one voice** for all academic / research medical and biological engineering and science communities in Europe

Position biomedical engineering (BME) on the EU research and policy agenda
